## 6. RESEARCH IN PROGRESS

- **Resources, Energy and Regions**  
Led two workshops culminating in a Special Issue for *Review of Policy Research*. Editor of the SI and author of two contributions: “The Politics behind Regional Electricity Grids in Africa” (June 2023, on-line) and the introduction which has been published on-line (January 2024) and will come out in hard copy in March 2024. Introduction has been translated into Mandarin and Spanish.
- **Energy Equity in the Global North**  
Much of the “energy justice” work has focused on the global South and inequalities between the global North and South. This project focuses on the global North and the work that we need to do to right prior racial, ethnic, and gender injustices. Includes an extensive literature review in progress, organizing and chairing a proposed panel (5 papers) for the 2023 International Studies Association annual convention, and early phase of fleshing out a book project.
- **Politics of Renewable Energy in the U.S. and Beyond**  
Book project. Co-author Frank Laird. Identifies and analyzes new players and coalitions for renewable energy – such as solar and wind trade associations, energy-intensive businesses, and some Republicans – as well as new political obstacles to renewable energy – such as permitting and NIMBYism. Paper has been accepted to and will be presented at the International Studies Association, April 2024.

## 6. FUNDING AND STUDENTS

### a. Funded Grants and Fellowships

- Co-PI, International Studies Association Workshop Grant on Energy Regionalism. Brought together 7 scholars from Europe, the Middle East, and the US. Funded by International Studies Association. \$17,547.
- Senior Researcher at the Research College, The Transformative Power of Europe, at Freie Universität Berlin, October 2015 – July 2016. Fellowship value of \$40,000.
- Co-PI, Exploring Energy Regionalisms, Hamburg, Germany. Brought together 16 scholars from Germany, Israel, Hungary, Norway, the US, and Australia. September 2016. Funding by Fritz Thyssen Stiftung, €10,000.
- Workshop on Rethinking Energy Geopolitics. Awarded September 2014. International Studies Association. Brought together 7 scholars, with a focus on linking North American and UK/European scholars. Funded by International Studies Association. \$4,935.
- Workshop on Global Political Economy of Energy. Awarded September 2013. International Studies Association. Brought together 25 scholars from seven countries, all working on IPE of energy, with the goal of publishing a book, creating a newsletter and research-focused website. Funded by International Studies Association. \$12,750.
- Working Group on International Political Economy of Resources, April 2013, San Francisco, CA. International Studies Association. Value equivalent: \$1,000
- Travel grant from the Colorado European Union Center for Excellence, Summer 2011, \$2,800.
- Teaching grant from the Colorado European Union Center for Excellence, Summer 2011, \$1,400.
- Travel grant from Southern African Institute for International Affairs & the European Center for Development Policy Management, January-February, 2011, approx. \$2,500.
- Travel grant from Berlin Center for European Studies at Freie Universität Berlin, December 2010, approx. \$2,000.

- Travel and Research Grant from the Institute for Security and Development Policy (ISDP) in Stockholm, Sweden. May 17-June 5, 2008; \$5000.
- Institute on Global Conflict and Cooperation Fellowship, 1997-98
- Institute on Global Conflict and Cooperation/MacArthur Fellowship, 1996-97
- Institute for International Education, Professional Development Fellowship, 1996-97
- George Washington University; Exxon Corporation Fellowship, 1988-89

**b. Unfunded Grants/Grants in Progress**

- National Science Foundation Research Traineeship: Graduate Traineeship in Low carbon, equitable, flexible, and sustainable communities. Communities need holistic energy solutions that include (1) the latest technologies for low-carbon and flexible energy (able to rapidly shift electricity supply and demand as needed by the grid) while also (2) quantifying social benefits such as improved health and greater equity. Our NRT will create (1) a research-focused cohort of PhD and MSc students paired with co-advisors from Mines and a National Lab, and (2) another cohort with an MSc (non-thesis) emphasis with internship opportunities in sustainable energy. Social sciences Lead. Budget: \$2,999,145. Submitted in 2023. Decision expected in April 2024.
- Co-PI and lead designer of the Community Benefits Plan for DOE grant proposal, “Advanced materials and operating conditions for intermediate-temperature protonic-ceramic steam electrolysis (P-SOEC).” \$3,011,243. Submitted 2023. Decision expected in April 2024.
- National Science Foundation Research Traineeship: Advanced Energy Systems. Successful low-carbon communities will require increased participation and buy-in from community members. The goal of the program is to produce engineers and social scientists who understand how to engage with communities, quantify benefits beyond energy, adapt to a changing energy field, have strong social justice skillsets, and are active allies for diversity, inclusion & access in STEM. Full proposal approved by Mines. Co-PI. \$2,999,227. My share: 5%. Submitted in 2022; not funded.
- Alfred P. Sloan Foundation. Co-PI. \$500,000. Grant goal: demonstrate and quantify that innovative and engaging community-scale holistic retrofits can produce more energy resilient, grid-flexible, low-carbon, energy efficient low-income communities. Submitted in 2022; not funded.

**c. Students Supervised (Thesis – HASS does not currently have a thesis track)**

## 9. TEACHING AND RELATED ACTIVITIES

### Courses Currently Taught

- Global Studies (HASS200)
- Energy Politics (HASS492/592)
- Natural Resources & Energy Policy: Theory and Practice (HASS593)

### Teaching Innovations

- **Resource Companies** Students of political risk assessment design and conduct research projects for domestic and multinational corporations in the natural resources and energy sectors.
- **Websites** Students learn to create their own websites, where they present their research projects.
- **Mock Professional Conferences** Students present their research at a mock conference, in which they sit on panels, and act as discussants and panel chairs. Discussants are required to submit written comments for the paper to which they are assigned. This teaches students to give and accept peer-reviews.
- **Treaty Negotiations** Students represent ministries in various countries in Eurasia. They have the goal of negotiating a treaty that all members of the former Soviet Union will sign. They first negotiate at the domestic level (State Dept. vs. Dept. of Energy, e.g.) and then at the international level. Project culminates in a written treaty.

- **Oxfam Hunger Banquet** Students organized an event on world hunger. We had about 250 attendees, including graduate and undergraduate students and several honored guests, notably the Provost and Vice President of Student Life. In their analysis of the event, 80% of the students said the banquet should be repeated annually or biannually.
- **Survey Design and Evaluation** Students created their own opinion poll on international affairs, analyzed the results, presented findings in class, and evaluated each team on its presentation.
- **Corresponding with Russian Students** Students engaged in an email exchange on course-relevant topics with students in St. Petersburg, Russia.
- **Team Interviewing** In small teams, students researched local human rights issues (death penalty, homelessness, and local prison conditions) and interviewed people related to the issue.
